

IBM Integration Technical Conference 2019

April 30 – May 2, 2019
Grapevine, TX

You are invited to join us at: IBM Integration Technical Conference 2019

You'll experience three days of in-depth technical sessions for developers, administrators and architects. You'll also hear about the new IBM® Cloud™ Integration Platform, which combines integration capabilities into a single, unified platform. In addition to the sessions with forward-looking topics, there will be many sessions on the traditional use cases that you support daily.
