## QRadar Community Edition Overview

IBM QRadar® Community Edition is a free version of IBM® Security QRadar intended for individual use, and is released without a warranty.

IBM QRadar Community Edition provides many of the same capabilities as QRadar with a license for 50 events per second and 5,000 flows per minute.

Anyone can download and try QRadar Community Edition for free. Download Community Edition if:

- You are a SOC analyst who wants to try QRadar in your environment to see whether the integrated analytic platform is a good fit for your organization.
- You are a developer who is creating QRadar apps, and you need an environment where you can test apps without affecting your production QRadar system.
- You are a QRadar user who needs to test and validate new use cases without affecting your production QRadar system.

The following table shows the features that are supported in QRadar Community Edition:

*Table 1. Comparison of QRadar capabilities*

Capability	QRadar SIEM	QRadar Community Edition
Full administrative capabilities	Yes	Yes
Customizable dashboards	Yes	Yes
Custom rules engine	Yes	Yes
Manage network and security events	Yes	Yes
Manage host and application logs	Yes	Yes
Threshold-based alerts	Yes	Yes
Compliance templates	Yes	Yes
Data archiving	Yes	Yes
WinCollect stand-alone deployments*	Yes	Yes
WinCollect managed deployments*	Yes	Yes
Network activity monitoring	Yes	Yes
Asset profiling	Yes	Yes
Offenses management	Yes	Yes
Network flow capture and analysis	Yes	Yes
Auto-updates	Yes	Yes
IBM Security X-Force® Threat Intelligence IP reputation feed integration	Yes	No
Historical correlation	Yes	No
Offline forwarding	Yes	No
QRadar Vulnerability Manager	Yes	No

Table 1. Comparison of QRadar capabilities (continued)

Capability	QRadar SIEM	QRadar Community Edition
QRadar Risk Manager integration	Yes	No
QRadar Incident Forensics integration	Yes	No
QRadar Network Insights integration	Yes	No
High Availability	Yes	No
Uploading a license	Yes	No
Software upgrades	Yes	No

\* You need an IBM customer number to access WinCollect from IBM Fix Central.

For help with QRadar Community Edition, visit the developerWorks forum (<https://developer.ibm.com/answers/topics/qradarce/?sort=newest&filter=all>).

## Installing QRadar Community Edition

Install IBM Security QRadar Community Edition on CentOS in a virtual machine. Community Edition is based on QRadar 7.3.0.

### Before you begin

You must have a system with a CentOS Linux 7.3 minimal installation that meets the following requirements to install QRadar Community Edition. See the CentOS documentation (<https://wiki.centos.org/Documentation>) for help installing and configuring CentOS.

- Your CentOS system must have internet access, or QRadar Community Edition installation fails.
- Use 8 GB for the SWAP partition and the defaults for other partitions.
- Disable SELinux to avoid a system restart during installation.

**Note:** QRadar Community Edition can't be installed in a Docker container.

Table 2. System requirements for QRadar Community Edition

Requirement	Description
Memory (RAM)	Minimum: 4 GB <b>Note:</b> You might need more RAM (or an app node) for some apps.
Free disk space	Minimum: 80 GB Optimal: 130 GB or higher
Processor	Minimum 2 CPU cores
Network adapter	You need at least one network adapter. <b>Note:</b> If you are using a locally hosted virtual machine with a local IP address, you must forward port 8444 to port 443 to access QRadar in a web browser, and forward port 2222 to port 22 to use ssh to connect to QRadar.

## Procedure

1. Download the QRadar Community Edition ISO from IBM developerWorks® (<https://developer.ibm.com/qradar/ce/>).
2. Copy the ISO to /tmp.
3. Create a /media/cdrom directory by using the following command:  

```
sudo mkdir /media/cdrom
```
4. Mount the QRadar Community Edition ISO by using the following command:  

```
sudo mount -o loop /tmp/<qradar_community_edition.iso> /media/cdrom
```
5. Run the QRadar setup by using the following command:  

```
sudo /media/cdrom/setup
```

**Note:** If you didn't disable SELinux before installation, your QRadar Community Edition system restarts during the setup. After the system restarts, repeat steps 4 and 5.

6. Follow the instructions in the installation wizard.

**Note:** Passwords must contain at least 3 of the following attributes:

- Uppercase characters
- Lowercase characters
- Special characters
- Numbers

## Results

You can access QRadar Community Edition in a web browser at [https://<ip\\_address>/console](https://<ip_address>/console). If you are using a locally hosted virtual machine with a local IP address, you can access QRadar Community Edition in a web browser on your host system at [https://<ip\\_address>:8444/console](https://<ip_address>:8444/console).

## What to do next

See “Getting Started with QRadar Community Edition” on page 5.

---

## Getting events from sources that are not supported by the default installation

To monitor events from software, devices, or appliances that aren't supported by the default installation of IBM QRadar Community Edition, you must install a DSM (Device Support Module).

### About this task

A *Device Support Module (DSM)* is a code module that parses received events from multiple log sources and converts them to a standard taxonomy format that can be displayed as output. Each type of log source has a corresponding DSM.

The *IBM Security QRadar DSM Configuration Guide* ([http://public.dhe.ibm.com/software/security/products/qradar/documents/iTeam\\_addendum/b\\_dsm\\_guide.pdf](http://public.dhe.ibm.com/software/security/products/qradar/documents/iTeam_addendum/b_dsm_guide.pdf)) lists the DSMs that are supported in QRadar. Only a few of the available DSMs are included by default in QRadar Community Edition, but you can add others.

The following DSMs are included by default in QRadar Community Edition:

- DSM-AssetProfiler
- DSM-SymantecEndpointProtection
- DSM-BluecoatProxySG
- DSM-IBMCustomDSM
- DSM-IBMHealthMetrics
- DSM-IBMSense
- DSM-GNULinuxServer
- DSM-OracleDbAudit
- DSM-PaloAltoPaSeries
- DSM-SourceFireSnort
- DSM-SIMNotification
- DSM-SIMAudit
- DSM-SearchResults
- DSM-STEALTHbitsStealthINTERCEPT
- DSM-IBMHealthMetrics
- DSM-SIMGenericLog
- DSM-UniversalCEF
- DSM-UniversalLEEF
- DSM-SIMUniversal
- DSM-McAfeeIntrushield
- PROTOCOL-IBMSIMJDBC
- PROTOCOL-JDBC
- PROTOCOL-LEA
- PROTOCOL-LogFileProtocol
- PROTOCOL-JdbcSophos
- PROTOCOL-TCPSyslog

## Procedure

1. Mount the QRadar Community Edition ISO by using the following command:  

```
sudo mount -o loop /tmp/<qradar_community_edition.iso> /media/cdrom
```
2. Go to the /media/cdrom/post/dsmrpms directory by using the following command:  

```
cd /media/cdrom/post/dsmrpms
```
3. Type the following command, where *<rpm\_filename>* is the name of a DSM that you want to install:  

```
yum -y install <rpm_filename>
```
4. Log in to the QRadar Community Edition user interface.
5. On the **Admin** tab, click **Deploy Changes**.
6. On the **Admin** tab, select **Advanced > Restart Web Server**.

## What to do next

See the *IBM Security QRadar DSM Configuration Guide* to help you add a log source.

---

## Getting Started with QRadar Community Edition

Depending on who you are, there are next steps to take:

- If you're a SOC analyst, you need to feed data into QRadar Community Edition.
  - See “Getting events from sources that are not supported by the default installation” on page 3.
- If you're a developer, you need to understand the QRadar app framework.
  - See QRadar App Development on IBM developerWorks (<https://developer.ibm.com/qradar/>) to download the QRadar SDK.
  - Check out information about QRadar apps ([https://www.ibm.com/support/knowledgecenter/SS42VS\\_7.3.0/com.ibm.appfw.doc/c\\_appframework\\_Extintro.html](https://www.ibm.com/support/knowledgecenter/SS42VS_7.3.0/com.ibm.appfw.doc/c_appframework_Extintro.html)).
- If you're a user, you need to get an overview of how QRadar works.
  - Check out the Getting Started topics in the Knowledge Center ([https://www.ibm.com/support/knowledgecenter/SS42VS\\_7.3.0/com.ibm.qradar.doc/c\\_qradar\\_oview.html](https://www.ibm.com/support/knowledgecenter/SS42VS_7.3.0/com.ibm.qradar.doc/c_qradar_oview.html)).
  - Watch some QRadar videos, and see other training material in the IBM Security Learning Academy (<https://www.securitylearningacademy.com/local/navigator/index.php?level=sisi01>).

## IBM Online Privacy Statement

IBM Software products, including software as a service solutions, (“Software Offerings”) may use cookies or other technologies to collect product usage information, to help improve the end user experience, to tailor interactions with the end user or for other purposes. In many cases no personally identifiable information is collected by the Software Offerings. Some of our Software Offerings can help enable you to collect personally identifiable information. If this Software Offering uses cookies to collect personally identifiable information, specific information about this offering’s use of cookies is set forth below.

Depending upon the configurations deployed, this Software Offering may use session cookies that collect each user’s session id for purposes of session management and authentication. These cookies can be disabled, but disabling them will also eliminate the functionality they enable.

If the configurations deployed for this Software Offering provide you as customer the ability to collect personally identifiable information from end users via cookies and other technologies, you should seek your own legal advice about any laws applicable to such data collection, including any requirements for notice and consent.

For more information about the use of various technologies, including cookies, for these purposes, See IBM’s Privacy Policy at <http://www.ibm.com/privacy> and IBM’s Online Privacy Statement at <http://www.ibm.com/privacy/details> the section entitled “Cookies, Web Beacons and Other Technologies” and the “IBM Software Products and Software-as-a-Service Privacy Statement” at <http://www.ibm.com/software/info/product-privacy>.
